

State Requirements

In compliance with the School Code, all students are required to submit to health and dental examinations in order to protect the school community from the spread of communicable disease; to ensure that the student's participation in health, safety and physical education courses meets his/her individual needs; and to ensure that the learning potential of each student is not lessened by a treatable physical disability.

We recommend that these exams be done by your child's pediatrician and/or your family dentist, at your expense, since they can best evaluate your child's health and help you to obtain the necessary treatment and correction. If this is not possible, the school doctor and dentist can perform these mandated exams with written parent permission.

The following are required examinations during a student's enrollment:

On original entry into school	Physical exam
	Dental exam
Grade 3	Dental exam
Grade 6	Physical exam
Grade 7	Dental exam
Grade 11	Physical exam

Physical and dental exam forms are available in the "Forms" section.

New students must submit both a physical and a dental exam, if these exams are not included in the school health record transferred with the student.
